Professional Summary

React Native developer and 2026 Computer Science graduate with hands-on experience building a **production Android application** using **React Native, Expo, and TypeScript**. Published WallpaperHub on the **Google Play Store** and managed Android builds, app signing, testing, and releases using Expo EAS and Google Play Console. Completed a three-month Python/Django internship at BloomGenix.

Technical Skills

Mobile: React Native, Expo, Expo Router, React Navigation, React Hooks, AsyncStorage, Android SDK
Languages: TypeScript, JavaScript (ES6+), Python, C/C++, SQL
Builds & Releases: Expo EAS Build, Android App Signing, Google Play Console, Closed Testing, Staged Rollouts
Backend & APIs: REST API Integration, JSON, Django, Flask, Node.js, MySQL, Postman
Tools & Practices: Git, GitHub, Reusable Components, State Management, Responsive UI, Debugging
Testing: Playwright, Puppeteer.js, End-to-End Testing, Automated UI Testing

Projects

WallpaperHub | React Native, Expo, TypeScript, REST API **Play Store** | GitHub

- Designed, built, and **published a production Android application** to the Google Play Store, serving **20+ active users** across multiple release versions.
- Integrated the **Pexels REST API** with paginated infinite scroll, keyword search, and category-based discovery, delivering access to thousands of high-resolution wallpapers.
- Implemented favorites with local persistence (**AsyncStorage**), one-tap downloads, and disk-level **image caching**, cutting repeat screen load time by ∼**40%**; built reusable **TypeScript** components with **Expo Router** navigation.
- Managed the Android release lifecycle, including **Expo EAS Build**, app signing, Play Console setup, closed testing, and staged production rollout.

PDF Master | React Native, Expo, TypeScript, Native APIs GitHub

- Built a **document management application** supporting document scanning, image-to-PDF conversion, multi-page PDF creation, and offline storage; integrated **native camera, gallery, and file-system APIs** for import, export, and sharing.
- Optimized image compression and PDF rendering, reducing generated file size by ∼**50%** and keeping 10-page conversions under **2 seconds** on mid-range devices.
- Packaged Android production builds using **Expo EAS Build** and managed application versioning and signing.

Handwritten Equation Solver | Python, Deep Learning, OpenCV, Flask GitHub

- Built an **OCR pipeline** using **OpenCV** preprocessing and a **CNN** classifier, reaching ∼**90% character-level accuracy**, with **SymPy** symbolic solving exposed through a **Flask** web interface.

Experience

Python Developer Intern | **BloomGenix** Jun 2025 – Aug 2025

- Developed and maintained backend features in **Python and Django**, contributing **10+ REST API endpoints** consumed by frontend and mobile clients.
- Debugged and refactored existing modules, reducing average API response time by ∼**30%** on frequently hit endpoints.
- Automated recurring data-processing workflows with Python scripts, reducing a manual multi-hour task to under 10 minutes and cutting manual effort by ∼**70%**.
- Built **automated end-to-end test suites** using **Playwright and Puppeteer.js**, scripting browser-driven UI and regression flows in JavaScript to catch breakages before release.

Education

B.Tech, Computer Science & Engineering | University of Lucknow 2022 – 2026
CGPA: 7.51/10

Class XII, CBSE | Kendriya Vidyalaya, Meerut 2021 – 2022
Percentage: 82%
